Greetings,

Thank you for your interest in the Field Management of Chemical and Biological Casualties Course (FCBC). The FCBC provides selected medics, clinicians and emergency responders with the medical and field experience needed to manage casualties in a chemical or biological environment.

The Navy Medicine Operational Training Center (NMOTC) will make the arrangements to enter your application into the Army training system, ATRRS.

Applicants should request a seat in the course by contacting the POC for FCBC at NMOTC, HM2 Joshua Soileau. He can be reached by phone (850-452-5488, DSN 459-5488) or e-mail (joshua.r.soileau.mil@mail.mil). **NMOTC makes all the selections as to who will attend the course.**

If you have any questions, concerns or even want to speak with an instructor about the course, feel free to call CCCD.

Sincerely,

The Chemical Casualty Care Division
